NOTE.—The great majority of females engaged in rural occupations are employed in conjunction with domestic duties, very few being returned as working for wages. Since 1919 a more careful collection has been made of the number of females engaged in rural pursuits, and it would appear that previously about 12,000 females were included each year (e.g., wives of the proprietors) who were engaged wholly in domestic duties. The number of females quoted in the above table for years prior to 1920 represents, therefore, the number as returned, less 12,000.

No. 54.—New South Wales Wheat Harvest, 1928-29 (Preliminary).

The figures were compiled from returns which were made while the crops were being harvested, and depend upon statements furnished by each of 16,965 wheat-growers in the State.

The area harvested for grain was 4,072,600 acres, including 191,600 acres which failed entirely.

The area sown for hay was 383,800 acres, including 14,000 acres which failed. The fed-off area was 12,100 acres, making a total of 4,468,500 acres sown with wheat, an increase of 469,240 acres over the previous season.

The stocks of old season's wheat and flour held in the State at the end of November, 1928, were (in equivalent wheat) 2,750,100 bushels, and the estimated exportable surplus was estimated to exceed 35,000,000 bushels as compared with approximately 14,250,000 bushels in the preceding season.

The following table shows the actual results of the wheat harvest in the principal divisions of New South Wales:—

* Information not available.

† Includes Ship Stores exported overseas.

Note—The exports in 1921 and 1927 include articles produced in other States of Australia. Since 1st January, 1912, the Commonwealth Customs Department has classified all goods produced in the Commonwealth simply a "Australian," without distinguishing, as formerly, the particular State where they were produced.
